- Great pay
- Low employee turnover rate

Job Summary

Wolverine Pipe Line Company is a transportation service company, headquartered in Portage, Michigan, and incorporated in 1952. We have 66 employees in the three states we operate — Michigan, Indiana and Illinois. Wolverine operates 630+ miles of active steel pipeline in three states, connecting Chicago refineries to terminals in Michigan and Northwest Indiana and moving product west to east. We transport over 350,000 barrels or 14.7 million gallons of refined products a day. Wolverine also provides approximately 30% of Michigan's daily refined products supply. We deliver the products that fuel the nation.

Wolverine does not own the product we ship. We are strictly a transport vehicle for our customers, much like UPS or FedEx is for packages. The Federal Government regulates the tariffs Wolverine charges to transport products between origins and destinations.

Summary of duties and responsibilities:

Remotely operate pumps, valves, and other equipment on a high-pressure pipeline transporting over a million gallons of gasoline each day using independent discretion, experience, and expertise in doing so. Monitor/analyze data received from meters, tanks, pressure transmitters, interface detectors, valves and other devices to operate the pipeline system.

It is the policy of Wolverine Pipe Line Company to provide equal employment opportunity in conformance with all applicable laws and regulations to individuals who are qualified to perform job requirements regardless of their race, color, sex, religion, national origin, citizenship status, age, physical or mental disability, veteran or other legally protected status

Essential duties and responsibilities: (Not all inclusive)

- Ability to work in a stressful and fast paced environment
- Ability to make quick decisions under duress, using independent discretion
- Ability to implement and achieve safe operations with the utmost responsibility for the protection of the population and the environment. Be thoroughly familiar with the actions to be taken in event of a system malfunction or abnormal operating condition
- Carry out the Scheduler's directives, while providing recommendations and suggestions as to any changes in the directives
- Implement operational measures determined by the Product Movement Manager
- Keep the Product Movement Manager advised of any significant problems
- Work with the field personnel in resolving pending problems requiring action by the Controllers
- Track displacements and ensure each grade is delivered as scheduled
- Maintain written logs of data and events as required
- Make proper notifications to management of abnormal or emergency operations
- Ability to participate and comply with the company's drug and alcohol program
- Regular attendance

Physical Environment/working conditions:

- Normal office environment

- Rotating Shift Work (12-hour shifts) Night and Day including some holidays
- Working alone on Nights and Weekends without supervision
- Occasional travel to field sites
- Occasional climbing stairs, standing, walking, kneeling, stooping, and bending
- Frequently reaching for and gripping objects.
- Ability to occasionally lift up to 20 lbs
- Ability to frequently perceive colors
- Ability to hear alarms
- Frequent sedentary position
- Frequent telephone use and reading
- Frequent use of office equipment
- Ability to satisfy the drug and alcohol requirements of the position
- Ability to work in stressful conditions with the ability to adapt and respond in changing circumstance

Qualifications and Skills

Education, prior work experience and specialized skills and knowledge :

- Capable of using computer systems and software
- Working knowledge of company policies, procedures, and governmental regulations that affect Pipeline operations
- Basic knowledge of petroleum products, terminal equipment, and operations
