

Cybersecurity Specialist

Wolverine Pipe Line Company is a transportation service company, headquartered in Portage, Michigan and incorporated in 1952. We have over 85 employees in the three states we operate - Michigan, Indiana and Illinois. Wolverine operates 700+ miles of active steel pipeline in three states, connecting Chicago refineries to terminals in Michigan and Northwest Indiana and moving product west to east. We transport over 350,000 barrels or 14.7 million gallons of refined products a day. Wolverine also provides approximately 30% of Michigan's daily refined products supply. We deliver the products that fuel the nation.

Wolverine does not own the product we ship. We are strictly a transport vehicle for our customers, much like UPS or FedEx is for packages. The Federal Government regulates the tariffs Wolverine charges to transport products between origins and destinations.

Why Should You Apply?

- We hire for the long term and we invest in your success
- We offer an outstanding benefits package that includes medical, dental, vision, paid vacation and holidays and 401k with company matching and additional company contribution after 1 year of service
- Great compensation
- Low employee turnover rate

Benefits:

Wolverine offers a competitive Total Rewards Package that consists of:

- Medical/Dental/Vision Insurance
- Life Insurance Plans
- Paid Time Off
- Tuition Assistance
- 401(k)
- Employee Recognition Programs

Summary of duties and responsibilities:

At Wolverine Pipe Line Co, we value our cybersecurity team as the first -- and last -- line of defense against protecting our sensitive data from cyber attack. We are seeking an experienced and vigilant cybersecurity specialist who can proactively prevent breaches of all sizes. Our ideal candidate understands cybersecurity standards and certifications, extensive knowledge on how cybercriminals work, and the determination to never let them in.

Essential duties and responsibilities: (Not all inclusive)

- Guard all company data, particularly sensitive data, from both internal and external threats by designing broad defenses against would-be intruders.
- Maintain application security, event investigations and compliance enforcement. Review personnel conduct in relation to data protection.
- Take the lead on day-to-day monitoring for unusual activities, implement defensive protocols, and report incidents.
- Collaborate with other members of the IT, OT, and SCADA teams to develop new protocols, layers of protection, and other both proactive and defensive systems that stay one step ahead of cyber criminals.
- Maintain security guidelines, procedures, standards, and controls documentation.
- Maintain current with new Information Technology Security protocols, applicable laws, and regulations.
- Maintain a working knowledge of current cybercrime tactics.
- Help support 100+ windows clients and IOS devices.
- Collect data on current security measures for risk analysis and write regular systems-status reports.

- Assist with managing SYSLOG software for Router, Circuit, Cellular and Ether Poll equipment monitoring.
- Constantly monitor for attack and run appropriate defensive protocols if breaches occur.
- Conduct vulnerability testing to identify weaknesses and collaborate with cybersecurity team to update defensive protocols as necessary.
- Configure anti-virus systems, firewalls, data centers and software updates with a security-first mindset.
- Grant credentials to authorized users, monitor access-related activities and check for unregistered information changes.
- Help lead employee training against phishing and other forms of cyberattack.

Education, prior work experience and specialized skills and knowledge:

- Degree in information systems, information technology or related field.
- 3-5 years' experience in cybersecurity at a mid- to large-size business preferred.
- Strong knowledge of IT systems including hardware software and networks.
- A meticulous eye for detail and ability to multitask in a fast-paced environment.
- Excellent verbal and written communication skills.
- Strong critical thinking, problem-solving, logic, and forensics skills.
- Ability to work successfully in both individual and team settings.

Physical environment/working conditions:

- Normal office environment
- Occasional travel
- Occasional climbing stairs, standing, walking, kneeling, stooping, and bending
- Frequently reaching for and gripping objects
- Ability to lift to 40 lbs.
- Frequent sedentary position
- Frequent telephone use and reading
- Frequent use of office equipment

Other:

- Access to proprietary and confidential information

It is the policy of Wolverine Pipe Line Company to provide equal employment opportunity in conformance with all applicable laws and regulations to individuals who are qualified to perform job requirements regardless of their race, color, sex, religion, national origin, citizenship status, age, physical or mental disability, veteran or other legally protected status.
