

Pipeline Controller

Wolverine Pipe Line Company is a transportation service company, headquartered in Portage, Michigan and incorporated in 1952. We have over 85 employees in the three states we operate in – Michigan, Indiana, and Illinois. Wolverine operates 700+ miles of active steel pipeline, connecting Chicago refineries to terminals in Michigan and Northwest Indiana and moving product west to east. We transport over 350,000 barrels or 14.7 million gallons of refined products a day. Wolverine also provides approximately 30% of Michigan's daily refined products supply. We deliver the products that fuel the nation.

Wolverine does not own the product we ship. We are strictly a transport vehicle for our customers, much like UPS or FedEx is for packages. The Federal Government regulates the tariffs Wolverine charges to transport products between origins and destinations.
